How to use this ebook

Starting a business in India is easier than most people think. A sole proprietor can start trading the same week, and most registrations are online and free. What trips people up is the order of steps and the paperwork that comes later. This guide puts the steps in order.

How to use this guide

- Read Module 1 before you register anything; the structure you choose decides the rest.
- Use *Start_Business_Checklist.xlsx* to tick off registrations, documents and the 90-day plan.
- Rules, limits and fees change. Every chapter names the official portal; check it before you file.

THIS IS A GUIDE, NOT LEGAL OR TAX ADVICE
For a company, a partnership with large capital, or anything involving investors or exports, speak to a chartered accountant or company secretary.

Contents

Choose your structure

1 Sole proprietorship, partnership, LLP or company

2 What a proprietor needs to start
